

Our plans for the future

Aberdeen City Health and Care Village

Introduction.

The NHS Grampian Healthfit Strategy (2002) tells us how healthcare services will be good services, where you are looked after:

By the right person.

In the right place.

At the right time.

We are building a new place called the Health and Care Village:

We will have lots of people working there that can help you with your health.

The Health and Care Village will be good for people in Aberdeen:

It will be easy to get to and close to the centre of Aberdeen.

Where will the Health and Care Village be built?

The Health and Care Village will be built between East North Street and Frederick Street.

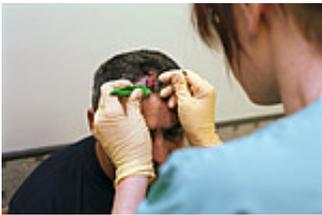

This is what the building will look like.

The building will be easy to get into for disabled people.

Some of the services in the new building will be:

Minor surgery.

Speech and Language Therapy.

Dentistry.

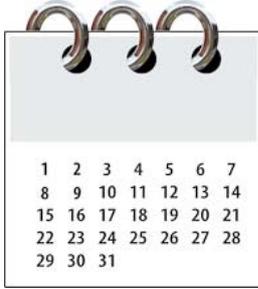

X ray.

Cardiac Services.

Podiatry.

When will it open?

We hope the Health and Care Village will be open in 2013.

We are working together with other people to get the Health and Care Village built.

How the Health and Care Village will work:

How do I get an appointment at the Health and Care Village?

Your doctor, health or social care professional can get an appointment for you.

There are some services you can go to that you do not need an appointment:

The Sexual Health Clinic.

Reception and Waiting Areas:

There will be a main reception.

A place to sit and wait.

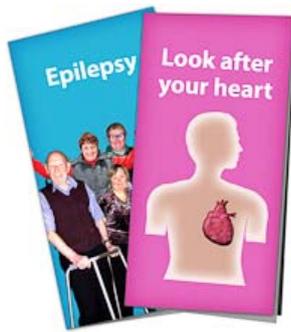

Toilets.

Baby Changing Rooms.

Café.

You can get information about looking after your health.

The information will be about healthy eating, exercise, smoking, and other things.

Access and Parking:

You get into the building by the main door. This is on Frederick Street.

There is another door at East North Street.

There will be a new car park on Frederick Street.

There will be disabled spaces next to the building.

The Health and Care Village will be good for you:

It will be friendly and welcoming.

You can see lots of different health and social care staff.

People will work together to make your care better.

The staff will talk to you about looking after your health.

There will be rooms that you can have meetings in.

**The Health and Care Village
will be good for staff:**

They can work together to help your care.

They can get training to help them learn new ways of working.

Get Involved:

Do you want to ask any questions about the Health and Care Village?

Do you want to tell us what you think about the Health and Care Village?
