NHS Grampian's Plan for the Future

NHS Grampian's Plan for the Future is about what we want for people's health and care in Grampian.

We listened to lots of people to find out what was important.

We will support people with their health and wellbeing.

We will work together to improve our services and support other services in the community.

We will work together with others to give the best care and support.

Why do we need this plan?

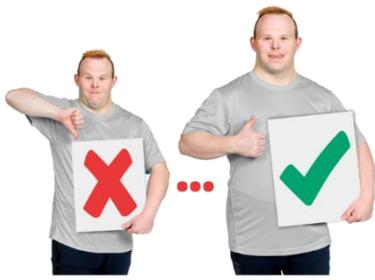

We want people to be healthy and have the same access to health and care services.

People need to get the right care and support at the right time.

The number of people that will need care and support will carry on growing over the next years.

This means more people will need our services.

We need to change our services to be able to care for and support more people.

We need to look at new ways of working to care and support people.

We need to make sure that people get the right support and service.

What we want to do?

We want to make sure that we work in the best way possible.

We want to help people to stay well and have healthy, happy lives.

We want to make health and care better for people living in Grampian.

We want people to get the right health and care at the right time.

We want to support people to look after their own health and wellbeing.

We want our communities to support people make good choices about their health and care.

NHS Grampian Delivery Plan

The Grampian Delivery plan is about the work we will do for our Plan for the Future.

This will help us to make things better.

These are the 3 important things we will work on:

- People
- Places
- Pathways.

People

We want everyone to stay well and have healthy and happy lives.

We want children and their families to stay well and have healthy and happy lives.

We want Health and Social Care staff in Grampian to stay well and have healthy and happy lives.

Places

NHS Grampian helps people with their health and also provides more than just healthcare to the local communities.

NHS Grampian works with many different organisations as well.

This can help everyone's wellbeing.

We will support people to use services in their community to improve their health and wellbeing.

Climate change is important and it can affect our health.

We want to be more environmentally friendly.

Pathways

We want people to have a say in their own health and care.

We want to make it easier for people to access services.

We will work together with others to give the best care and support.

We will work with:

- You
 - Other organisations
 - Families
 - Carers.
-

What next?

We will support people with the changes we need to make in our services.

We will work closer together to make health and care better for everyone.

We will keep listening to what people tell us and working together to make health and care services better.
