

NHS Grampian Joint Wound Care Formulary February 2023

Primary Care Order Form

It is important that all wounds are regularly assessed and the management of a wound documented.
The NHS Grampian Applied Wound Management Assessment Chart must be completed for any wound (excluding non-complex surgical wounds) – available from central stores Stock number ZKB902.
Although ordering is encouraged via PECOS, this DOES NOT negate the need for products to be prescribed.
Please note that not all of the items in this document are included in the Nurse Prescribers' Formulary (NPF), and therefore cannot be supplied on a GP(10)N written by a community nurse prescriber.
